ABOUT ME

React and React Native Developer with 4+ years of experience building scalable web and mobile applications across gaming, healthcare, and e-commerce domains. Specialized in modular component architecture, role-based authentication, and frontend performance optimization. Delivered 6+ production applications with hands-on experience in end-to-end development, REST API integration, and direct client-facing delivery.

SKILLS

• HTML5	• CSS3	• JavaScript	• React JS
• React Native	• Redux	• Git	• Tailwind CSS
• Next JS	• TypeScript	• Jest	• Web Socket

EXPERIENCE

Jan 2024 - Present
Charles Technologies Private Limited
Chennai

- MA Quick Scanner — Lottery Ticket Management System**
- Architected a scalable React-based Admin Panel with 25+ modular **reusable components**, reused across 8+ screens and reducing new-feature development time.
 - Implemented secure **role-based authentication** and protected routing across user roles and 20+ routes, eliminating unauthorized-access
 - Reduced UI redundancy by designing reusable layout and form components.
 - Coordinated directly with client stake holders for on-site deployment support.
- Gamer Exchange — Real-Time Gaming Platform**
- Designed and developed Admin Panel and web application aligned with mobile version.
 - Integrated **WebSocket** for real-time odds updates, cutting UI refresh latency and eliminating full-page reloads..
 - Optimized dynamic rendering to handle continuous real-time data updates efficiently.
 - Structured scalable component hierarchy to support future feature expansion.
- ThinkFlick — AI-Based Educational Application**
- Built a full-stack React + Node.js platform with 15+ REST APIs and a MySQL schema.
 - Integrated **Gemini AI** API for dynamic MCQ generation, implementing prompt engineering to deliver grade-appropriate and subject-specific questions.
 - Built a real-time leaderboard system with point tracking and designed the complete user flow from registration to quiz completion.

Jul 2021 – Sep 2023
Avon Global Solutions Private Limited
Chennai

- Purchezz — A Parcel Tracking & Order Management System**
- Developed a **responsive web app** spanning the full parcel lifecycle, pickup, transit, delivery, returns handling 10K+ orders translating wireframes into scalable, production-ready code.
 - Enhanced the existing application by redesigning UI/UX for improved usability.
 - Built form-driven workflow using React Hooks for structured data input.
- Medify — Doctor & Patient Information Management System**
- Refactored 10+ legacy screens into a standardized UI component library, improving cross-screen visual consistency and reducing CSS duplication.
 - Developed a fully responsive landing page aligned with modern design standards.
 - Collaborated with the design team to ensure user-friendly interfaces.

EDUCATION

2014 - 2018
B.E. Electronics and Communication
Sri Eshwar College of Engineering
